

## Antico

### Antique Finish

An exceptionally artistic method, Antico provides a three dimensional effect which can be perceived by both look and touch. Depending on the number of layers and the preferred method of application, various levels of texture can be achieved. These fall into three main categories – Antico Stone, Antico Rain and Antico Vein. Additional coats of various glazes can be added atop this textured product to create a heightened illusion of depth and dimension, transforming the wall into a magnificent piece of art.
